

Arrangements for the Termination of a Nuclear or Radiological Emergency

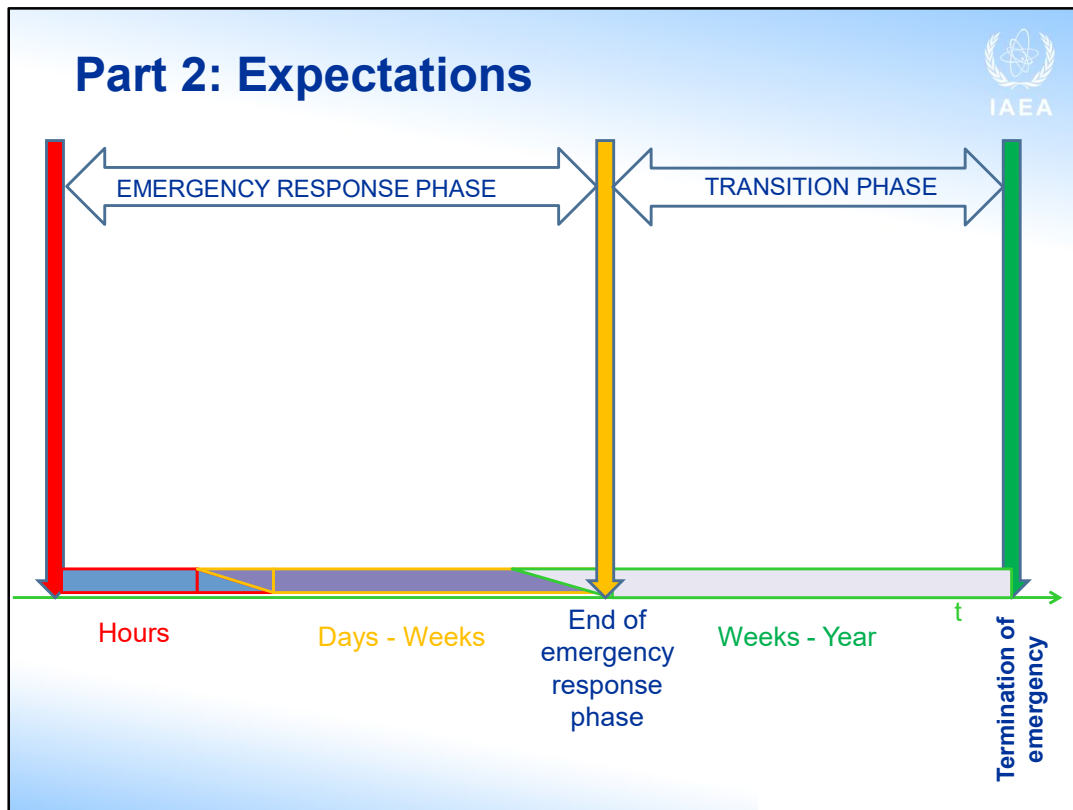

Working Session: Part 2

Purpose of the Presentation: Elaborate the work expected to be done during the second part of the Working Session

Learning Objectives: Get familiar with the expectations for the second part of the Working Session

Duration: 60 minutes

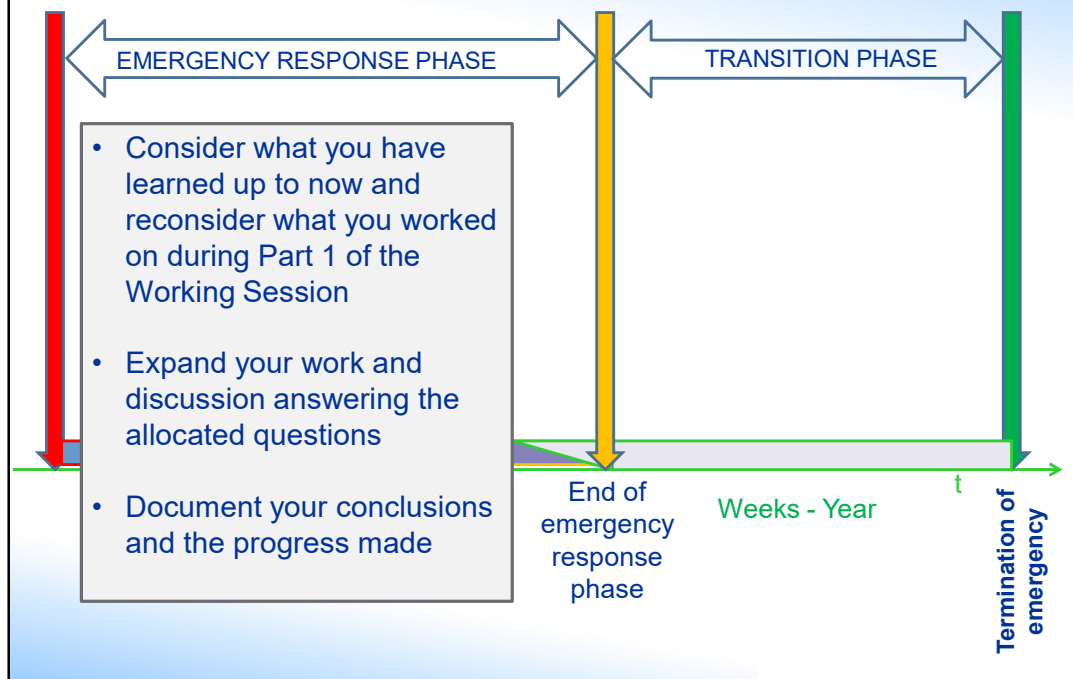

Reference: Guide for lecturers available in the training materials

Lecture notes:

Members of the WGs are expected to revisit their responses to Part 1. They need to consider the details of the postulated emergency to determine which exposure situation is likely to follow the transition phase and the associated preparations that would be necessary. They also need to consider whether they have identified all actions necessary to achieve the primary objective and all of the general and specific prerequisites for termination as presented earlier. This is to be done before the newly allocated questions given on the next slide are additionally considered.

Part 2: Expectations (cont'd)

Part 2: Questions to be considered

- **What activities and actions are necessary to allow for the nuclear or radiological emergency to be terminated and the primary objective of termination to be met?**
- **What organizations and services may be involved during the transition phase?**
- Questions can be found in your folders.
- Time allocated: about **60 mins**

Lecture notes:

Make it clear to participants when they should report on the progress made (the last five minutes of allocated time in the Agenda).

A short discussion of this Working Session will be held during the last 5 minutes of WG work to provide an opportunity for the group to provide feedback on the extent to which their thoughts have changed as a consequence of the lectures on Day 1.

Good luck!

Lecture notes:

Thank you!
