

Arrangements for the Termination of a Nuclear or Radiological Emergency

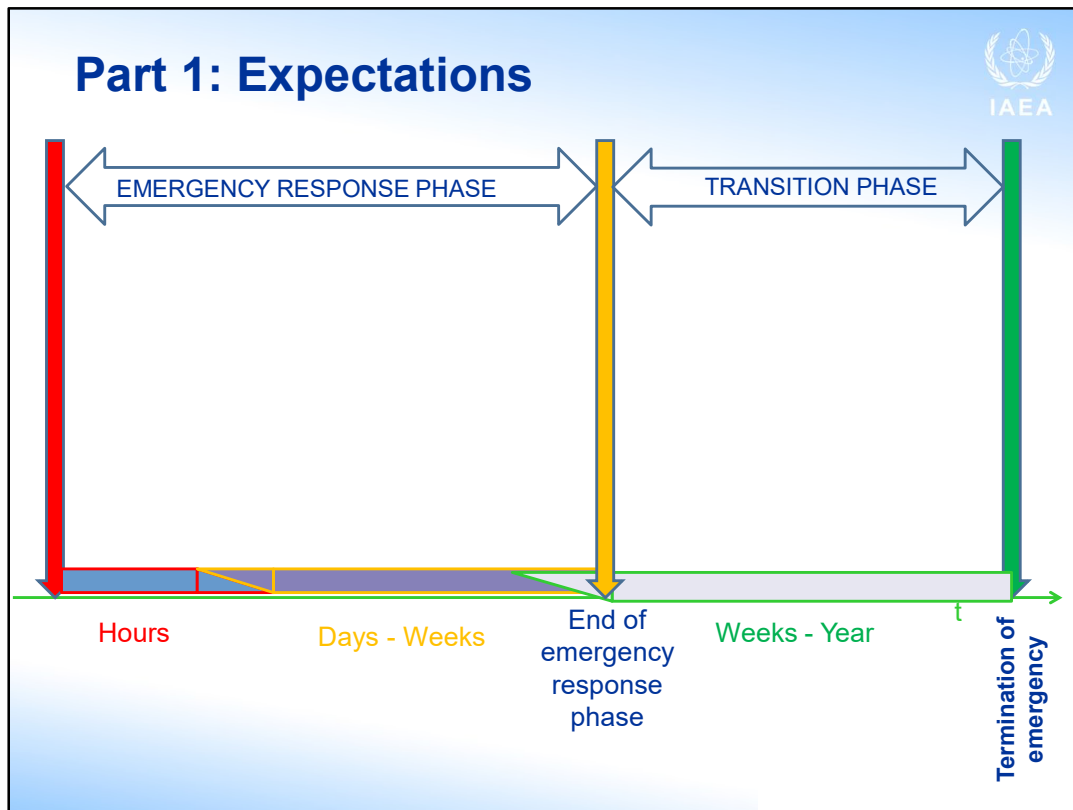

Working Session: Part 1

Purpose of the Presentation: Elaborate the work expected to be done during the first part of the Working Session

Learning Objectives: Get familiar on the expectations for the first part of the Working Session

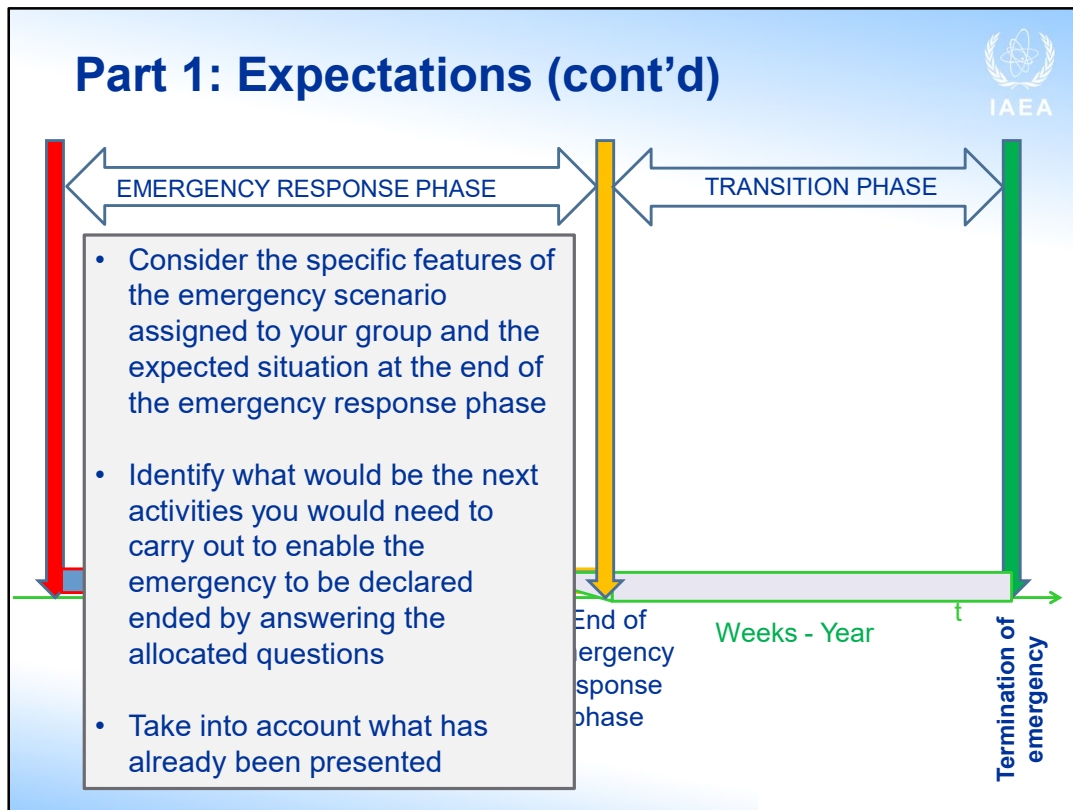

Duration: 60 minutes

Reference: Guide for lecturers available in the training materials

Lecture notes:

Members of the WGs need to read the scenario descriptions (provided to them before the start of the Working Session) carefully, noting the relevant information provided on the situation inherited at the end of the emergency response phase.

Lecture notes:

They should then discuss the subject of the questions and elaborate what the necessary preparations should be.

Part 1: Questions to be considered

- **What exposure situation will likely follow the transition phase?**
- **What preparations (in terms of activities and actions) would need to be completed during the transition phase to enable the emergency to be formally terminated?**
- Questions can be found in your folders
- Time allocated: about **60 mins**

Lecture notes:

Make clear to participants when they should report on progress made (the last five minutes of allocated time in the Agenda).

Feedback on how discussions progressed is sufficient; detailed presentations are not expected at this stage.

This part also provides an opportunity to request clarification of the scenario descriptions or further information needed.

Good luck!

Lecture notes:

Thank you!
